PROFILE

Industrial engineer (Istanbul Bilgi University, 2026) grounded in the Toyota Production System on the gemba. Finds where a process loses time, quality or space, traces it to root causes and makes the fix stick: preventive maintenance, incoming quality control, warehouse layout and ergonomics. Works in Excel and Python, at ease between the shop floor and the team. Looking for a graduate role in operations.

 - Redesigned the labelling station with MTM, cutting time per piece by 43%.
 - Re-laid out the warehouse with ABC slotting in a Blender/Python twin, doubling lower-floor storage.
 - Coded an ISO 2859-1 incoming quality control app (React/TypeScript) with QR carton traceability.
 - Assessed ergonomics with heart rate, RULA and NIOSH; planned worker rotation and a lifting aid.
