PROFILE

Industrial engineer (Istanbul Bilgi University, 2026) who thrives on vague problems: measuring them, finding where the system breaks and turning them into something people use, whether a production line, a warehouse or a product. Moves easily between the shop floor, the product team and the code, and takes ideas all the way to shipped work, from a hospitality marketing studio co-founded with two friends to personal web products. Looking for a product or operations role.
